

INDICATION

Clear + Brilliant@laser system (1440nm and 1927nm handpieces) is indicated for dermatological procedures requiring the coagulation of soft tissue and general skin resurfacing.

IMPORTANT SAFETY INFORMATION

- The following contraindications are routine for many laser treatments and may also be associated with non-ablative Clear + Brilliant Laser System treatments. You may not be an appropriate candidate for a treatment if you:
 - Have been diagnosed with or possibly have actinic keratosis, melasma, rosacea, or other significant skin conditions (e.g., skin cancer, active infections, cold sores, open wounds, rashes, burns, inflammation, eczema, psoriasis);
 - Are predisposed to keloid formation or excessive scarring;
 - Have a condition that may compromise the immune system, such as HIV, lupus, scleroderma, or systemic infections;
 - Have a known sensitivity to light or if you are taking photosensitizing agents or medications;
 - Are on systemic steroids (e.g., prednisone, dexamethasone), which should be rigorously avoided prior to and throughout the course of treatment;
 - Are using retinoids, which should be avoided for at least 2 weeks prior to and during treatment;
 - Are undergoing isotretinoin acne treatment or taking drugs in a similar class;
 - Have skin that is still recovering from a cosmetic procedure, such as a chemical or mechanical peel, or laser resurfacing; and
 - Have had botulinum toxin injections, or dermal fillers (such as collagen or hyaluronic acid) within the past 2 weeks.

Talk to your doctor for more information about Clear + Brilliant, and see www.clearandbrilliant.com for additional details.
